

Find your new home

Olesya Tsapenko

June 07, 2020

1. Introduction

1.1 Background

Every year thousands and thousands international students graduate from European Universities. Fair share of graduates want to stay and work in the EU. A lot of them might face the challenge of not knowing the local language. They start to search for cities/countries where they can find a job in English preferably in the EU. There are at least three well-known EU capitals for it - Amsterdam, Paris and Berlin.

1.2 Problem

To find a job purely in English - it is a big problem but to find a new home may be even harder. On one hand - each city is a unique experience. But on the other hand there are many neighborhoods which have pretty similar venues around. At this work I will compare 3 EU capitals' neighborhoods and cluster them to identify some similar places for living based on surrounding venues. In the second part I will add my current neighborhood and show a comparison between it and possible places for living. The script is flexible and assumes that any user can provide their address and look at the personal recommendations.

1.3 Interest

Freshly graduated international students from EU universities would be interested to find a new home for themselves which is similar to their living place. Comparison of neighborhoods/cities/countries can also help to find a place which is absolutely different with the current life situation if this is the goal of the user.

Others who are interested in this comparison such as educated English-speaking people may also want to choose a place to move in the EU.

2. Data acquisition and cleaning

2.1 Data sources

The first challenge which I met is to find a list of all neighborhoods of given cities. For this, I parsed Wikipedia web-pages using the beautiful-soup python framework. The next step is to receive coordinates (latitude and longitude) of each neighborhood which I did with the help of a

geopy library (also this library helps me to find coordinates of my current living place). When we already have latitude and longitude of each neighborhood it is easy to find venues in the given radius (500 meters) using API requests to Foursquare service.

2.2 Data cleaning

Unfortunately, I could not receive coordinates of absolutely all neighborhoods using geopy so these places were excluded from future analysis. Also I dropped neighborhoods which have less than 4 venues in the radius of 500 meters. On top of that, I renamed French, German and Dutch restaurants categories to one category “Local cuisine restaurant” to make clustering more unbiased.

As a next step of data cleaning, I calculated all unique venue categories and encoded each of them using one-hot-encoding. Later I group all venues by neighborhood and by taking the mean of the frequency of occurrence of each category. It became a feature for my future clustering and recommendation. I want to mention that I didn't use any geographical-related features such as latitude, longitude, city or country names, neighborhood names to make the clustering more objective for geographically-separated places.

3. Methodology

Because my data is unlabeled I have to choose one of the unsupervised Machine Learning methods. For comparison of different neighborhoods I've picked k-mean clustering.

I set up 10 clusters and repeated k-mean clustering 1000 times in order to find the solution close to global optimum instead of local one.

After receiving results of clustering, I excluded clusters with 3 or less neighborhoods from future analysis.

4. Results

I've plotted clusters individually for each city and for my current location.

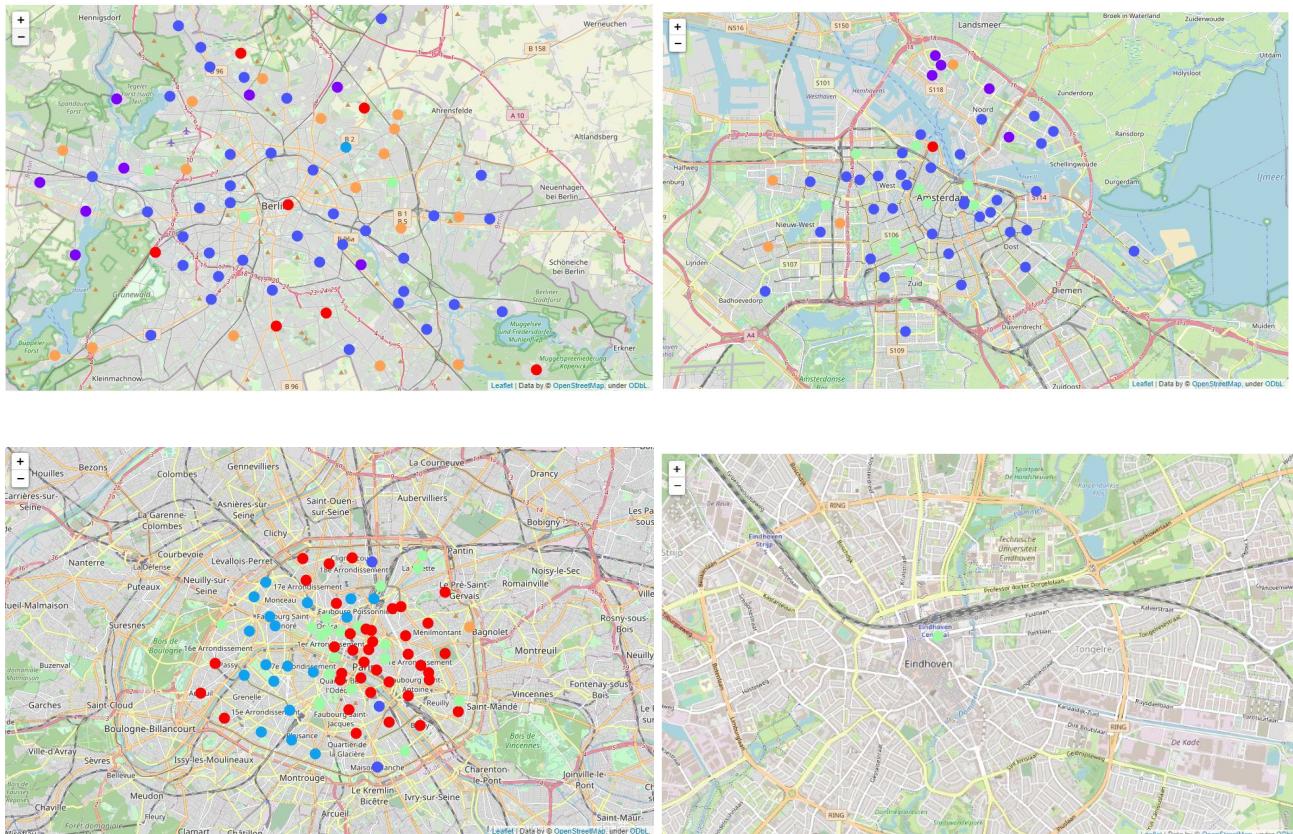

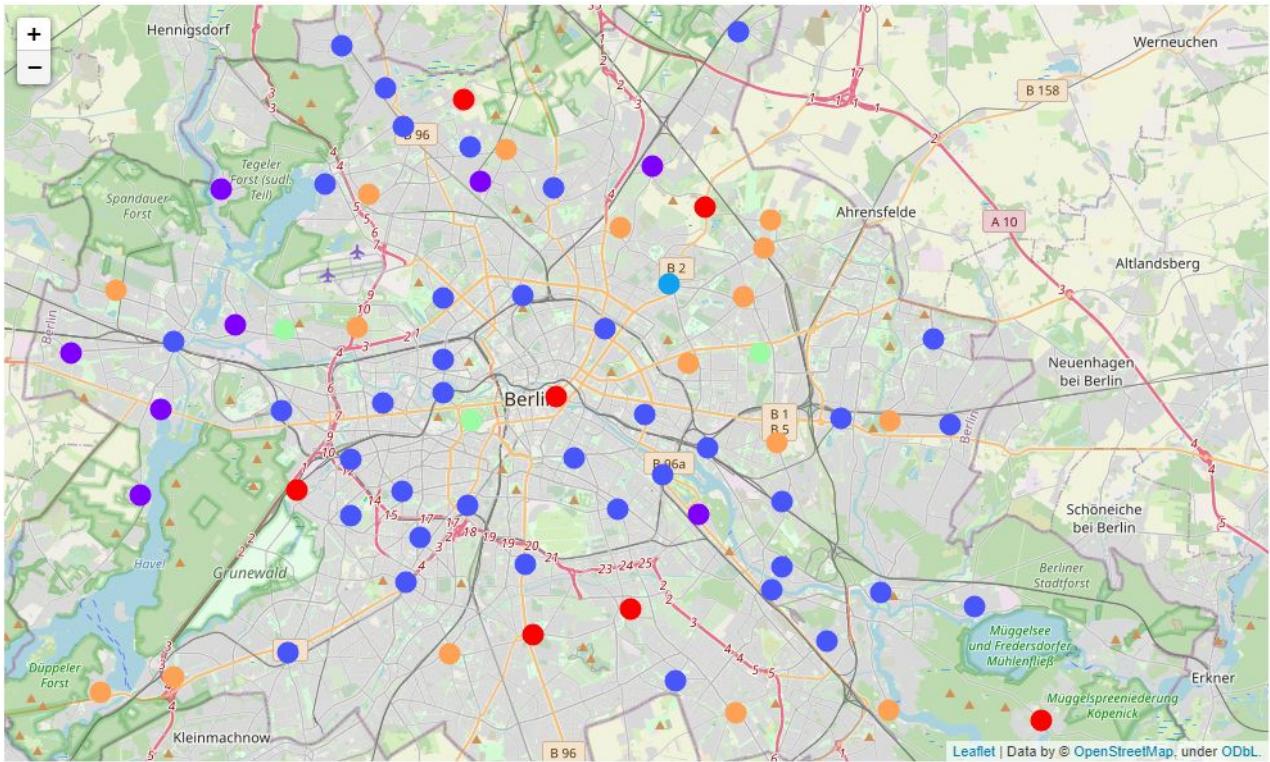

Figure 1. Clusters from left to right from top to bottom:
Berlin, Amsterdam, Paris, Eindhoven (current location)

The full statistics about clusters for all neighborhoods:

| Neighborhood | |
|----------------|----|
| Cluster Labels | |
| 1.0 | 13 |
| 2.0 | 76 |
| 3.0 | 19 |
| 6.0 | 35 |
| 8.0 | 21 |
| 10.0 | 46 |

4.1 Berlin

Let's have a look closely at clusters in Berlin:

Neighborhood

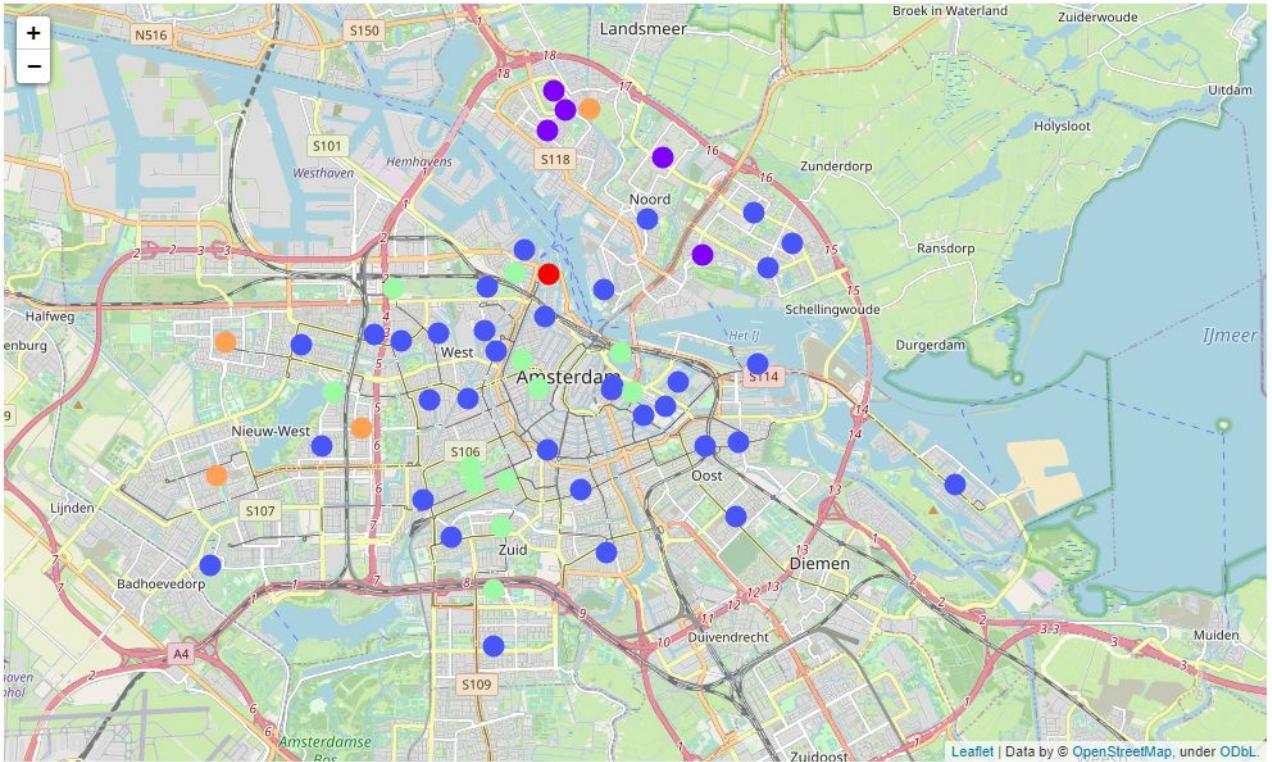

Cluster Labels

| | | |
|------|----|---------------------|
| 1.0 | 8 | (purple circle) |
| 2.0 | 38 | (blue circle) |
| 3.0 | 1 | (light blue circle) |
| 6.0 | 3 | (green circle) |
| 8.0 | 16 | (orange circle) |
| 10.0 | 7 | (red circle) |

We can see that Berlin is a very diverse city and at the same time it has only 3 neighborhoods which are similar to my current location. Also Berlin has neighborhoods from each cluster which we received.

4.2 Amsterdam

Let's have a look closely at clusters in Amsterdam:

Neighborhood

Cluster Labels

| | | |
|------|----|----------|
| 1.0 | 5 | (purple) |
| 2.0 | 35 | (blue) |
| 6.0 | 12 | (green) |
| 8.0 | 4 | (orange) |
| 10.0 | 1 | (red) |

We can see that Amsterdam is less diverse than Berlin and at the same time it has a lot of neighborhoods (12) which are similar to my current location. Also Amsterdam doesn't have any neighborhoods from cluster 3.

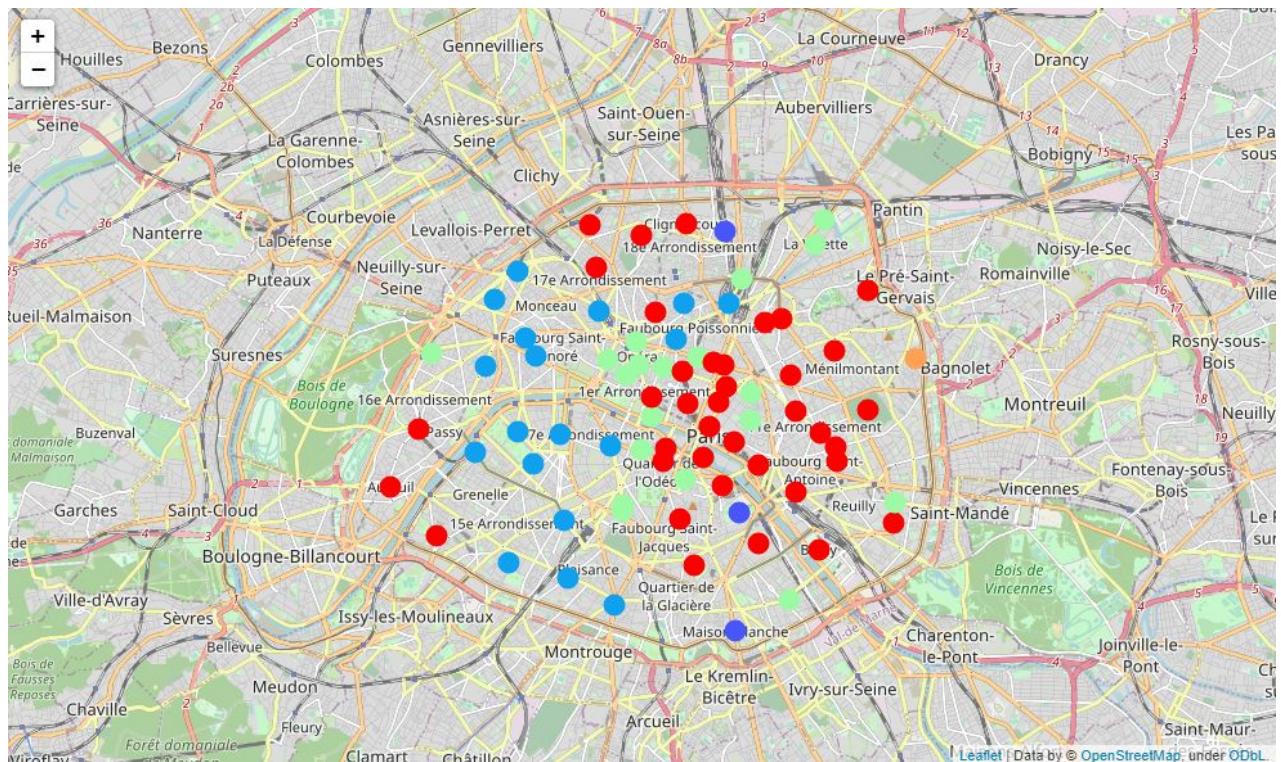

Let's look closely to cluster 3 (part of it):

| Neighborhood | 1st Most Common Venue | 2nd Most Common Venue | 3rd Most Common Venue | 4th Most Common Venue | 5th Most Common Venue | 6th Most Common Venue | 7th Most Common Venue | 8th Most Common Venue | 9th Most Common Venue | 10th Most Common Venue |
|---|--------------------------|--------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|--------------------------|-----------------------|-------------------------|
| 9 (0302) Weißensee, Berlin, Germany | Local Cuisine Restaurant | Hotel | Park | Beach | Vietnamese Restaurant | Café | Fishing Store | Falafel Restaurant | Farm | Farmers Market |
| 183 Saint-Thomas-d'Aquin, Paris, France | Local Cuisine Restaurant | Hotel | Italian Restaurant | Art Gallery | Café | Bakery | American Restaurant | Cheese Shop | Bistro | Tailor Shop |
| 184 Les Invalides, Paris, France | Hotel | Local Cuisine Restaurant | Italian Restaurant | Plaza | Café | History Museum | Cocktail Bar | Japanese Restaurant | Cheese Shop | Coffee Shop |
| 185 École-Militaire, Paris, France | Local Cuisine Restaurant | Hotel | Plaza | Coffee Shop | Japanese Restaurant | Historic Site | Sculpture Garden | Brasserie | Supermarket | Bistro |
| 186 Gros-Caillou, Paris, France | Local Cuisine Restaurant | Italian Restaurant | Hotel | Bistro | Ice Cream Shop | Coffee Shop | Café | Cheese Shop | Bakery | Garden |
| 187 Champs-Élysées, Paris, France | Hotel | Local Cuisine Restaurant | Japanese Restaurant | Italian Restaurant | Tailor Shop | Clothing Store | Art Gallery | Boutique | Cosmetics Shop | Spa |
| 188 Faubourg-du-Roule, Paris, France | Hotel | Local Cuisine Restaurant | Jewelry Store | Italian Restaurant | Japanese Restaurant | Electronics Store | Sporting Goods Shop | Café | Bakery | Scandinavian Restaurant |
| 190 Europe, Paris, France | Local Cuisine Restaurant | Hotel | Thai Restaurant | Restaurant | Bistro | Asian Restaurant | Korean Restaurant | Mediterranean Restaurant | Sushi Restaurant | Sandwich Place |
| 193 Faubourg-Montmartre, Paris, France | Local Cuisine Restaurant | Hotel | Italian Restaurant | Pizza Place | Cocktail Bar | Japanese Restaurant | Chinese Restaurant | Gym / Fitness Center | Burger Joint | Bakery |

We can observe that these places are full of local restaurants, Hotels, Cafes, etc. and Amsterdam has a lack of such neighborhoods.

4.3 Paris

Let's have a look closely at clusters in Paris:

Neighborhood

Cluster Labels

| | | |
|------|----|--|
| 2.0 | 3 | |
| 3.0 | 18 | |
| 6.0 | 19 | |
| 8.0 | 1 | |
| 10.0 | 38 | |

We can see that Paris is also less diverse than Berlin and at the same time it has a lot of neighborhoods (19) which are similar to my current location. Also Paris doesn't have any neighborhoods from cluster 1.

Let's look closely to cluster 1:

| | Neighborhood | 1st Most Common Venue | 2nd Most Common Venue | 3rd Most Common Venue | 4th Most Common Venue | 5th Most Common Venue | 6th Most Common Venue | 7th Most Common Venue | 8th Most Common Venue | 9th Most Common Venue | 10th Most Common Venue |
|-----|---|-----------------------|------------------------|-------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|------------------------|
| 10 | (0303) Blankenburg, Berlin, Germany | Bus Stop | Supermarket | Greek Restaurant | Café | Flower Shop | Farm | Farmers Market | Fast Food Restaurant | Field | Fish & Chips Shop |
| 20 | (0313) Wilhelmsruh, Berlin, Germany | Bus Stop | Post Office | Mexican Restaurant | Supermarket | Bakery | Cycle Studio | Dance Studio | Farmers Market | Fast Food Restaurant | Field |
| 29 | (0502) Haselhorst, Berlin, Germany | Park | Furniture / Home Store | Supermarket | Automotive Shop | Bus Stop | Metro Station | Flea Market | Falafel Restaurant | Farm | Farmers Market |
| 31 | (0504) Staaken, Berlin, Germany | Lake | Supermarket | Restaurant | Bus Stop | Flower Shop | Exhibit | Falafel Restaurant | Farm | Farmers Market | Fast Food Restaurant |
| 32 | (0505) Gatow, Berlin, Germany | Italian Restaurant | Supermarket | Trattoria/Osteria | Bus Stop | Harbor / Marina | Hotel | Fishing Store | Exhibit | Falafel Restaurant | Farm |
| 36 | (0509) Wilhelmstadt, Berlin, Germany | Bus Stop | Harbor / Marina | Lake | Supermarket | Boat or Ferry | Park | Sporting Goods Shop | Department Store | Fondue Restaurant | Farmers Market |
| 56 | (0902) Plänterwald, Berlin, Germany | Bus Stop | Supermarket | Light Rail Station | Flower Shop | Falafel Restaurant | Farm | Farmers Market | Fast Food Restaurant | Field | Fish & Chips Shop |
| 87 | (1203) Konradshöhe, Berlin, Germany | Bus Stop | Italian Restaurant | Supermarket | Restaurant | River | Diner | Falafel Restaurant | Farm | Farmers Market | Fast Food Restaurant |
| 108 | Banne Buiksloot, Amsterdam, Netherlands | Bus Stop | Supermarket | Park | Bakery | Shopping Mall | Restaurant | Turkish Restaurant | Fish Market | Event Space | Exhibit |
| 109 | Buiksloot, Amsterdam, Netherlands | Bus Stop | Park | Health & Beauty Service | Campground | Rest Area | Ice Cream Shop | Fishing Store | Falafel Restaurant | Farm | Farmers Market |
| 113 | Molenwijk, Amsterdam, Netherlands | Pharmacy | Theater | Shopping Mall | Plaza | Bookstore | Supermarket | Bus Stop | Zoo Exhibit | Farm | Farmers Market |
| 115 | Oostzaneerwerf, Amsterdam, Netherlands | Bus Stop | Supermarket | Furniture / Home Store | Shopping Mall | Bookstore | Zoo Exhibit | Flower Shop | Farm | Farmers Market | Fast Food Restaurant |
| 118 | Tuindorp Oostzaan, Amsterdam, Netherlands | Bus Stop | Plaza | Theater | Snack Place | Business Service | Motorcycle Shop | Baseball Field | Convenience Store | Food Service | Farm |

These neighborhoods mostly have a lot of bus stops, farms and farmers markets and Paris has a lack of these places.

5. Conclusion

Personally, I'm searching for a city/neighborhood which is not similar to my current life situation. Because of it I don't choose Amsterdam and Paris as the cities with many neighborhoods similar to mine. I see that Berlin is the most interesting city for me with plenty different neighborhoods.
